Recycled Content, Aluminum Profile Extrusion

Pawling Corporation provides numerous impact protection products incorporating aluminum profile extrusion. These profiles are used extensively in corner guards, crash rails, wall guards, and handrails. The aluminum used in these products contains a typical mix of:

Post Consumer Scrap:	10%
Post Industrial Scrap:	60%
Primary Aluminum:	30%

In accordance with guidelines set forth in USGBC – LEED V2.2, the recycled content of the aluminum is:

$$\text{Post Consumer} + 1/2 * \text{Post Industrial} = 10\% + 1/2 * 60\% = 40\%$$
